DETAILED ACTION

Summary

On November 26, 2004, an Office Action was mailed to the Applicant rejecting claims 1-30. On March 3, 2005, the Applicant responded by filing a Rule 1.131 Affidavit.

Specification

The objection has been withdrawn.

Drawings

The objection has been withdrawn.

Claim Rejections - 35 USC § 101

The rejection has been withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Ponn (US 2002/0062265).

Ponn discloses a method and corresponding apparatus with means and computer program product with instructions for facilitating user selection of an item category in an online auction comprising receiving a registration request, the registration

request including a service description and an identification of category within the taxonomy in which the service is to be registered, applying one or more canonical service description tests to the service description to determine if the service description should be registered in the category, and registering the service description in the identified category if a result of applying the one or more canonical service description tests is that the service description should be registered in the identified category (p.49, 26-32); one or more canonical service description tests identify minimum criteria for the category (p.49, 26-32); registering the service description in the category includes storing the service description and an associated model description in a storage association with the category (p.49, 26-32); implementation in a service broker within at least one network (p.49, 26-32); if the result of applying the one or more canonical service description tests is that the service description should not be registered in the category, a determination is made as to whether a request to add a new category is received (p.49, 26-32); if a request to add a new category is received, a determination is made as to whether to add the new category, and wherein if the new category is added, the service description is registered in association with the new category (p.49, 26-32); one or more canonical service description tests include information identifying minimum requirements of the category regarding one or more of security requirements, privacy requirements and communication protocol requirements (p.49, 26-32); if the result of applying the one or more canonical service description tests is that the service description should not be registered in the category, searching the taxonomy for an alternate category in which the service description should be registered and registering

the service description in the alternate category (p.49, 26-32); searching the taxonomy for an alternate category includes searching one or more of sibling, parent and child categories of the identified category within a predetermined range of the identified category in the taxonomy (p.49, 26-32); and searching the taxonomy for an alternate category includes searching the taxonomy for a category in which the service description meets requirements of a canonical service description test associated with the alternate category (p.49, 26-32).

Response to Arguments

Applicant's arguments with respect to claims 1-30 have been considered but are most in view of the new ground(s) of rejection.
